THE IMAGING CENTER OF MURFREESBORO INSTALLS NEW COMPUTED TOMOGRAPHY (CT) SYSTEM

GE BrightSpeed® 16 Slice CT System Provides High Quality Images and Reduces Radiation Exposure

MURFREESBORO, TN (February 16, 2010) – The Imaging Center of Murfreesboro recently announced that it installed the new BrightSpeed® 16 slice computed tomography (CT) system from GE Healthcare. The CT system is one of the most advanced diagnostic tools for helping physicians reach confident patient diagnoses by delivering high quality images with improved resolution and lowered radiation dose.

“The addition of the GE BrightSpeed® 16 slice system provides us with vastly improved image quality and imaging speed, and enhances the overall diagnostic confidence we have in all of our studies,” said Stan Burcham, M.D. of the Imaging Center of Murfreesboro.

CT exams are used when people are ill or injured, or when a physician suspects a medical problem that is not easily detectable from a conventional physical examination. The GE BrightSpeed® 16 slice configured system non-invasively assists physicians in the diagnosis of a variety of anatomical areas.

To schedule an appointment at The Imaging Center of Murfreesboro, please call (615) 890-8999.

About Insight Imaging

Insight Imaging, headquartered in Lake Forest, California, is a provider of retail and wholesale diagnostic imaging services. Insight Imaging serves a diverse portfolio of customers, including healthcare providers, such as hospitals and physicians, and payors, such as managed care organizations, Medicare, Medicaid and insurance companies, in over 30 states, including the following targeted regional markets: California, Arizona, New England, the Carolinas, Florida and the Mid-Atlantic states.
